RENT HOUSE

Batch Code	: 3 SC 1
Start Date	: September 30, 2016
End Date	: October 20, 2016
Name Of The Coordinator	: Bayu Citra Nur Aulia S.T,M.TI
Name Of Developer	: Muhammad Hudya Ramadhana Mutia Ayu Dianita
Date Of Submission	: October 21, 2016

CERTIFICATE

This is to certify that this report, titled Jobfield Recruitment embodies the original work done by *Muhammad Hudya Ramadhana* and *Mutia Ayu Dianita* in partial fulfillment of their course requirement at NIIT.

Coordinator:

Bayu Citra Nur Aulia S.T,M.TI

ACKNOWLEDGEMENT

We have benefited a lot from the feedback and suggestions given to us by Mrs. Bayu Citra Nur Aulia S.T, M.TI and other faculty members. The Project presentation opportunity we have with CCIT-FTUI is a greatchance for learning and professional development. Therefore, we consider ourselves very lucky as we are provided with an opportunity to be a part of it. We are also grateful for having a change to meet so many wonderful people and professionals who led us through this project period.

Bearing in mind, we would like to express our deepest gratitude and special thanks to Bayu Citra Nur Aulia S.T, M.TI of CCIT-FTUI faculty who is spite of being extraordinarily busy with her duties, took time out to hear, guide and keep us on the correct path and allowing us to carry out our project until completion.

Our Project assignment won't be as good as it is now without any help, feedback and suggestion that were given to us by our friends within the campus. So, we would also like to say thank you to all of them. We will strive to use gained skills and knowledge in the best possible way, and we will continue to work on the improvements, in order to attain desired career objective.

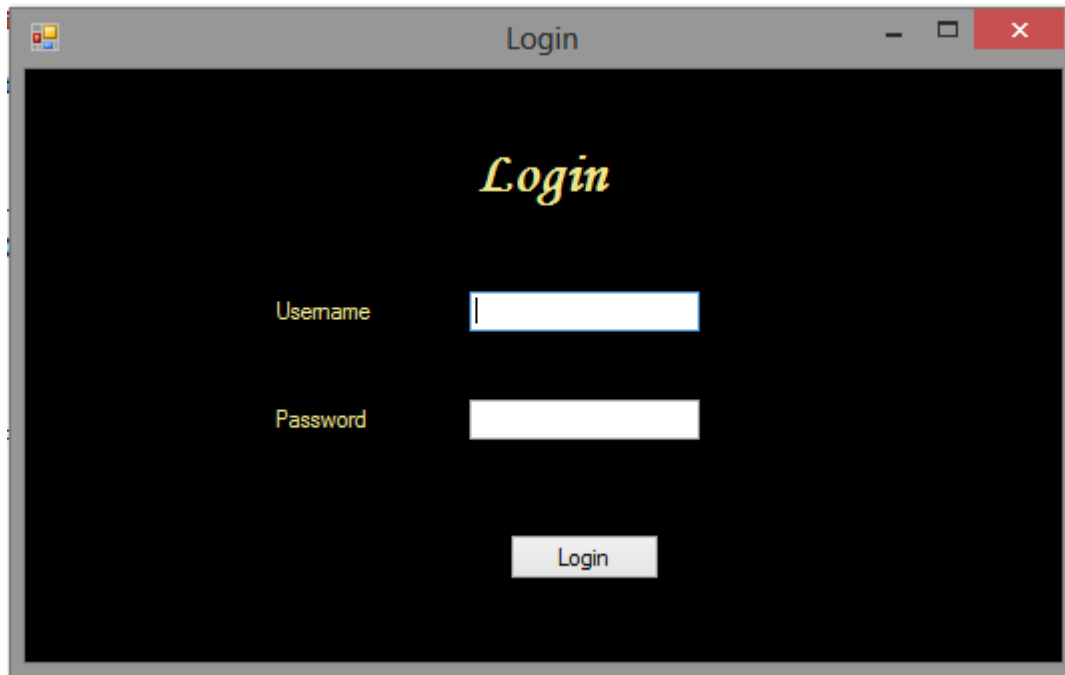

SYSTEM ANALYSIS

System Summary:

Rent House Application is an application that allows admin to add customer, room, laundry, rent, and monthly paid data to rent house's database. This application also displays the data and admin can update and delete the data. And admin can see the report of monthly paid of customer

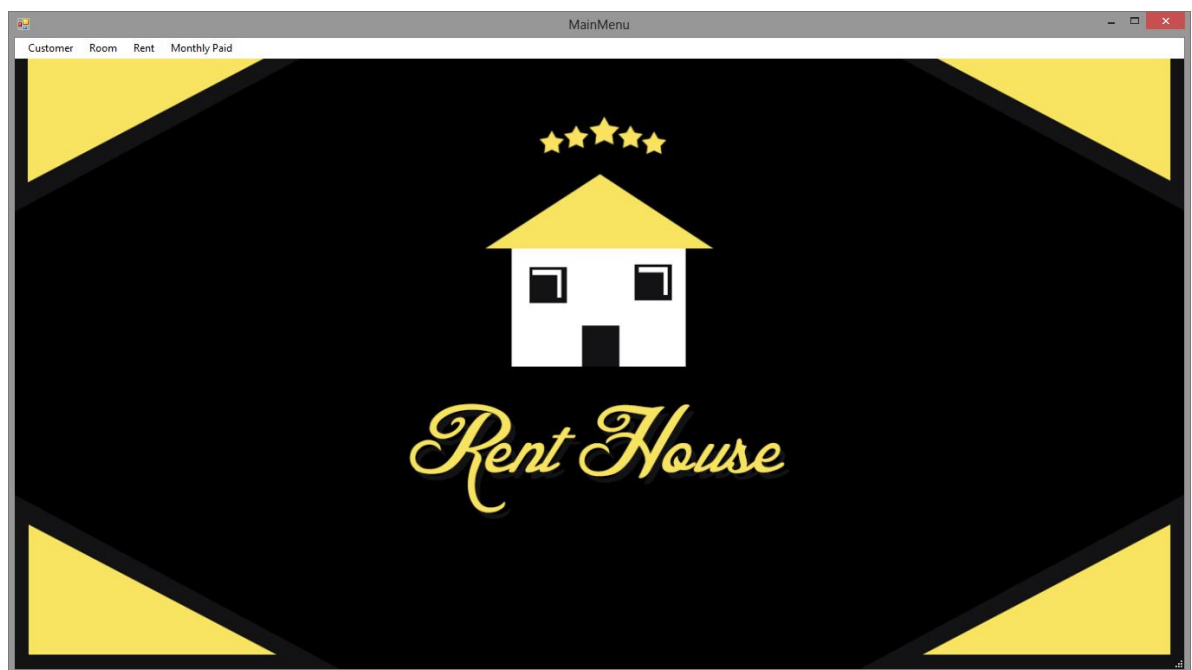

RENT HOUSE INTERFACE

Login Form

A screenshot of a web browser window titled "Login". The window has a dark gray header bar with standard window controls (minimize, maximize, close) on the right. The main content area has a black background. In the center, the word "Login" is written in a large, yellow, cursive font. Below it, there are two white input fields. The first field is labeled "Username" in a yellow sans-serif font. The second field is labeled "Password" in a yellow sans-serif font. Below the password field is a white rectangular button with the word "Login" in a gray sans-serif font.

id_room	varchar	4	Room ID
name	varchar	50	Name of the Room
price	int		Price of the Room
id_type_room	varchar	4	Type Room ID
status	varchar	20	Status of the Room

Type Room:

Field Name	Data Type	Width	Description
id_type_room	varchar	4	Type Room ID
name	varchar	50	Name of Type Room
description	text		Description of the Type Room

VALIDATION PERFORMED

Admin:

Validation Required	Method Used For Validation
Id must be unique	Primary key constraint

Customer:

Validation Required	Method Used For Validation
Id must be unique	Primary key constraint
birthdate	Age must be above 17

Monthly Paid:

Validation Required	Method Used For Validation
Id must be unique	Primary key constraint
id_rent	Foreign key from rent table

Rent:

Validation Required	Method Used For Validation
Id must be unique	Primary key constraint
id_customer	Foreign key from customer table
id_room	Foreign key from room table

Room:

Validation Required	Method Used For Validation
Id must be unique	Primary key constraint
id_type_room	Foreign key from type_room table

Type Room:

Validation Required	Method Used For Validation
Id must be unique	Primary key constraint
