# ACKNOWLEDGEMENT

We have benefited a lot from the feedback and suggestions given to us by Mrs. Bayu Citra Nur Aulia S.T, M.TI and other faculty members. The Project presentation opportunity we have with CCIT-FTUI is a greatchance for learning and professional development. Therefore, we consider ourselves very lucky as we are provided with an opportunity to be a part of it. We are also grateful for having a change to meet so many wonderful people and professionals who led us through this project period.

Bearing in mind, we would like to express our deepest gratitude and special thanks to Bayu Citra Nur Aulia S.T,M.TI of CCIT-FTUI faculty who is spite of being extraordinarily busy with her duties, took time out to hear, guide and keep us on the correct path and allowing us to carry out our project until completion.

Our Project assignment won't be as good as it is now without any help, feedback and suggestion that were given to us by our friends within the campus. So, we would also like to say thank you to all of them. We will strive to use gained skills and knowledge in the best possible way, and we will continue to work on the improvements, in order to attain desired career objective.

# SYSTEM ANALYSIS

**System Summary:**

Jobfield Recruitment is a web that helps a company to recruit programmers. The programmers can apply job to the company by this web. Also the admin can see the data of the appliers so they can choose the programmer that suits the job.

There are 2 main pages in this web, for applier and for admin. When the main page for applier shown, in the display there are several things that the appliers can do, they can see the news in main page and click the news details and fill the form, after that appliers can see the data in card page. User also can send the message for admin by fill the message form in contact us page.

The main page for admin display sidebar for admin menu, admin can add and see the list of appliers data, add and see the list of news data, and see the list of messages from appliers.
